

- 1 TULIP TREE**  
A member of the Magnolia family, Tulip Trees are associated with the Carolinian Life Zone.
- 2 SEA-LILIES**  
Erosion undercutting the limestone here is faster in beds of these Silurian Crippaits or "Sea-lilies", present today in the Atlantic Ocean.
- 3 TRILOBITES**  
On this earth for 325 million years, they became extinct 250 million years ago. Trilobites grew to a maximum of 2 feet long, but in our shales they are only 2 inches.
- 4 WINTERGREEN BANK**  
This was the bank of the river abandoned 10,500 years ago!
- 5 MAMMOTH POTHOLE**  
Naturally formed holes in the limestone by harder stone spinning and drilling into the rock by water current.

## WELCOME TO THE NIAGARA GLEN

Please enjoy the trails in the Niagara Glen for walking and **hiking at your own risk**. Niagara Parks encourages all hikers to respect this nature area by not littering, staying on the marked trail, and carrying out anything carried in. Take only photographs; leave only footprints!

Please note that some trail sections include steep cliffs, rough trails, slippery rocks, loose rocks overhead, and fast running water. Winter conditions may produce additional hazards, including icy patches and those caused or obscured by snowfall.

Remember to keep dogs under control at all times. Cycling and swimming in the Niagara Glen are strictly prohibited. **IN CASE OF EMERGENCY, DIAL 911.**

## TRAIL RATING CLASSIFICATION

\*All Niagara Glen trails are classified as "Moderate" with the exception of Whirlpool Trail, which is considered "Difficult". Always wear proper footwear and bring water when hiking.

- |                 |  |                  |   |
|-----------------|--|------------------|---|
| <b>MODERATE</b> | Suitable for most hikers with basic trail experience; infrequent obstacles; gently rolling with short, steep sections. | <b>DIFFICULT</b> | Experienced hikers; trails have non-established surfaces; many steep sections that may continue for long periods; obstacles common. |
|-----------------|--|------------------|---|
